About LVC Company Limited

LVC Company Limited is a Tanzanian-owned and managed limited liability company specialising in the importation and supply of premium mining explosive products throughout Tanzania and neighbouring countries.

LVC sources and supplies the highest quality explosive products available on the East African market guaranteeing product availability under all conditions, wet or dry season, for large-scale mines and small artisanal operations alike.

Our technical teams travel to every site, studying rock properties before recommending the right blasting materials and patterns. From first consultation to post-blast review, LVC is present at every stage, ensuring safety, efficiency, and genuine value for our clients.

SURFACE MINING OPERATIONS — LVC PRODUCT TERRITORY

Our Core Strengths

The pillars that make LVC a trusted drilling and explosives partner across East Africa.

01 Licensed Explosives Expertise

LVC holds the Ministry of Minerals Permit to Sell, 4 Magazine Licences, Business Licence as Explosives Dealer, TIN, VAT, and Tax Clearance the most comprehensive compliance portfolio in the sector.

03 Experienced Technical Team

Our personnel conduct on-site rock property assessments before every project. Blasting patterns are designed specifically for each geology and our team stays through execution and post-blast review.

02 World-Class Product Supply

Authorised importer for BME (Omnia Group, South Africa) and Tan Nobel supplying the most advanced electronic detonator systems, bulk emulsions, and ANFO blasting agents on the East African market.

04 All-Weather, All-Scale Operations

Our dual-supplier model and licensed storage in Mbozi District guarantees year-round supply. We serve both large-scale gold mines and small artisanal operations with equal commitment.

Vision & Mission

VISION

To become a top supplier of various mining explosives sourced from world-renowned manufacturers and suppliers across East and Central Africa.

To become a renowned, efficient, and cost-effective service provider in the mining and construction industries nationally and internationally solving industrial challenges facing the local, regional, and international mineral, energy, and construction industry.

"Meets Your Explosive Requirements"

MISSION

To enhance the availability of the best explosive products suitable to all weather conditions rainy or dry season and to all miners, large and small, across East Africa.

To provide professionally high-quality and efficient technical services to the mining, energy, and construction industries fostering a safe, healthy, and environmentally friendly working environment that contributes to the sustainable development of these industries.

Our Objectives

01 Contract Services in Mining & Drilling

- 1 To provide contract services in mining and construction with major focus on surface and underground blasting pattern drilling, underground production drilling, quarrying, and tunneling in East and Central Africa.

03 Training & Capacity Building

- 3 To provide training to client employees in Safety, Health and Environment (SHE), Drilling and Explosive Blasting Technology, and Mine Rescue services across mining and civil construction projects.

05 Empowering Small-Scale Miners

- 5 To develop the capacities of small-scale miners by supplying user-friendly explosive and drilling products with comprehensive after-sale services and technical support.

02 Professional Explosives Supply

- 2 To provide professionally high-quality explosive products and blasting services to mining, energy, and construction industries maintaining a safe, healthy, and environmentally responsible operational environment.

04 Market Leadership in East Africa

- 4 To raise LVC's profile and deliver the best products at competitive prices integrating domestic and international market customer satisfaction across East Africa.

06 International Partnerships & Growth

- 6 To promote LVC's products and services internationally through strategic partnerships with world-class manufacturers expanding our footprint beyond Tanzania across the African continent.

Our Core Values

Unwavering commitment to excellence, safety, and sustainable service delivery.

01 Integrity

We operate honestly in every client engagement, regulatory filing, and supplier relationship — no shortcuts, no compromise.

02 Transparency & Honesty

Clear pricing, honest timelines, and straightforward advice define how we work with every client, large or small.

03 Reliability

Our clients depend on us to deliver on time, every time. We back our supply chain with licensed storage and multiple supplier relationships.

04 Quality of Workmanship

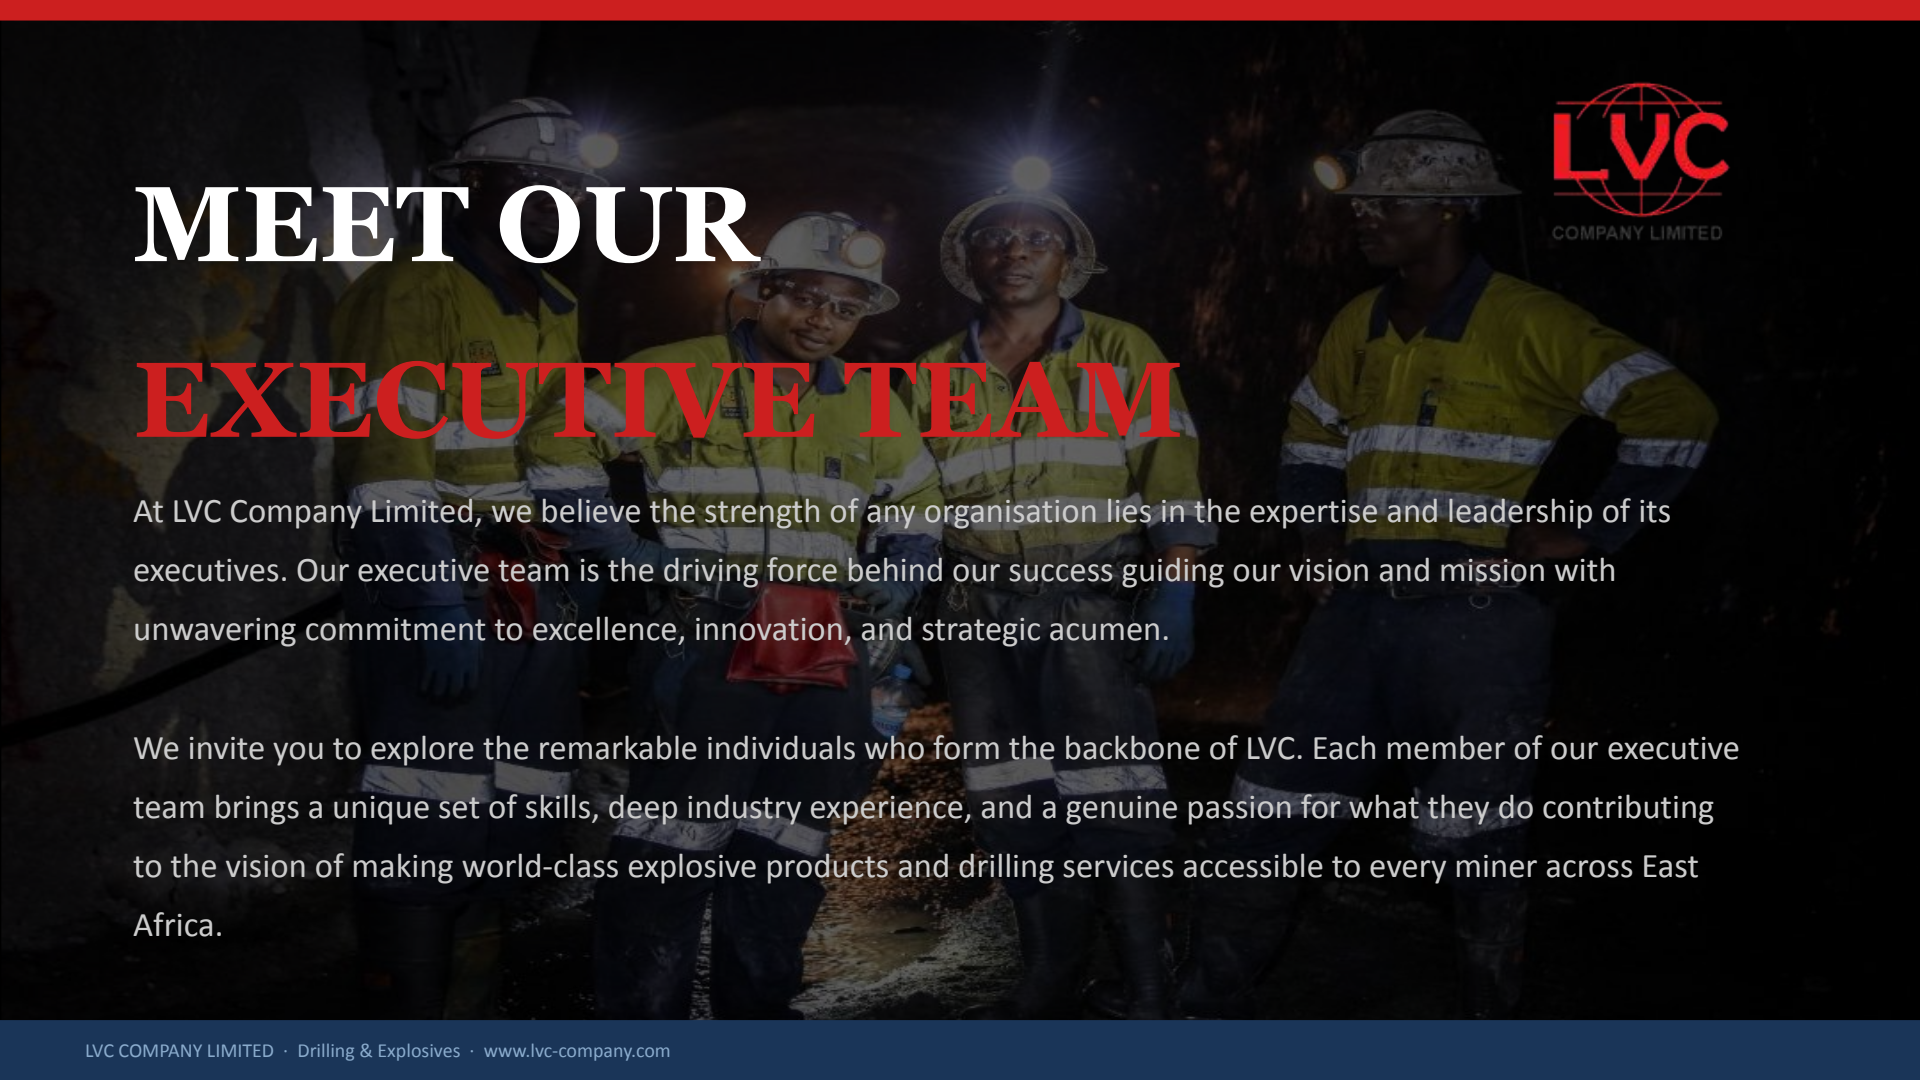

From blasting pattern design to product delivery, we maintain the highest technical standards and verify results on the ground.

05 Affordability

Access to world-class blasting technology should not be restricted by price. Competitive pricing is a promise, not a marketing line.

06 Knowledge Sharing

We offer training in SHE, drilling, and explosives blasting technology — promoting knowledge sharing and mine rescue capability.

A photograph of four individuals, likely executives, standing in a dimly lit underground mining environment. They are wearing high-visibility yellow safety vests with reflective silver stripes, dark trousers, and hard hats with headlamps. The background shows the rough, rocky walls of a tunnel, with some equipment and cables visible. The lighting is focused on the individuals, creating a professional and industrial atmosphere.

MEET OUR EXECUTIVE TEAM

At LVC Company Limited, we believe the strength of any organisation lies in the expertise and leadership of its executives. Our executive team is the driving force behind our success guiding our vision and mission with unwavering commitment to excellence, innovation, and strategic acumen.

We invite you to explore the remarkable individuals who form the backbone of LVC. Each member of our executive team brings a unique set of skills, deep industry experience, and a genuine passion for what they do contributing to the vision of making world-class explosive products and drilling services accessible to every miner across East Africa.

Our Executive Leadership

LEOPOLD BULONDO - CHAIRMAN

HANS BULONDO - MANAGING DIRECTOR

GLORIA BULONDO - DIRECTOR

Delivering Excellence Below and Above Ground

LVC offers a comprehensive range of drilling and explosives services prioritising safety, health, and the environment.

01 Explosives Supply & Importation

Full range imported year-round electronic detonators, pumpable explosives, bulk emulsions, initiation systems.

02 Blasting Pattern Drilling Services

Subcontracted on-site blasting pattern drilling preceded by rock property assessment and pattern design.

03 Licensed Storage & Magazine Facilities

4 government-licensed magazines in Mbozi District available for hire, storing up to 60T explosives + 400K detonators.

04 Technical Support & After-Sale Service

On-site blasting expertise, product selection guidance, and comprehensive after-sale support for all client sizes.

05 Regional Supply East Africa

Operations across Tanzania and neighbouring East African countries remote site delivery capability.

06 Blasting Consultation

Site-specific consultation: rock assessment, charge design, blast pattern optimisation minimising cost per tonne.

Drilling Services

Precision in every drill from surface bench blasting to underground stoping.

PRECISION IN EVERY DRILL

01

Blasting Pattern Drilling

Site visits before every project. Rock properties studied optimal drill pattern, hole diameter, and explosive charge determined for each specific geology.

02

Surface & Open-Pit Drilling

Bench blasting in opencast mines, quarries, and civil works. Full supply of ANFO, bulk emulsion, and booster systems to complete the entire blasting cycle.

03

Underground Face Drilling & Stopping

Stope drilling and tunneling blasting using VIPERDET SD and LP series for precise sequential initiation in narrow reef and wide-reef underground environments.

04

Subcontracting & Partnership Model

LVC partners with specialist drilling contractors providing drilling, explosives, initiation systems, and on-site technical supervision in one integrated package.

Explosives Supply & Blasting Works

0

Bench Blasting

1

Open-cast mines and quarries precise charge design per hole depth, diameter, and rock type.

0

Stope & Underground Blasting

2

VIPERDET SD/LP series for controlled sequential initiation in underground environments.

0

Road Construction & Civil Works

3

Blasting for earthworks, foundation clearing, and aggregate production.

0

Tunneling

4

Face drilling and blasting for underground tunnel development in mining and infrastructure.

Our Product Range

01 PACKAGED EXPLOSIVES

BULK EMULSIONS · ANFO · COMBO SYSTEMS

PGAN

Porous Granular Ammonium Nitrate foundational blasting agent for surface operations

INNOVEX

Packaged ANFO blasting agent with consistent performance across rock types

INNOPAK Combo Super Plus

29 × 270 mm / 29 × 580 mm — high-energy combination cartridge

INNOPAK Combo Super

27 × 270 mm / 27 × 580 mm — standard combination configuration

02 INITIATING SYSTEMS

ELECTRONIC · SURFACE · UNDERGROUND

VIPERDET LP Series

Reliable initiation for underground and surface mining/blasting applications

VIPERDET SD Series

Sequential initiation for underground narrow reef stoping

VIPERDET MS Down Hole

Precision downhole detonator for surface mining and blasting

VIPERDET Trunkline

Accurate delay sequencing for surface connections

03 BLASTING ACCESSORIES

BOOSTERS · PRIMING · DETONATING CORD

VIPER Boosters

High-strength priming charges for surface mining, quarrying, and civil works

Full Initiation System Range

Complete detonating cord connectors with colour-coded delay labels

Booster-Sensitive Systems

Booster-sensitive blasting agent systems for all applications

Cord Connector Clips

Sealed end clips with marked colour-coded delay number labels

Licensed Magazine Storage Facilities

LVC holds four government-licensed magazine facilities — Section 32, Explosives Act 1963 at Nanyala Village, Mbozi District.

Combined capacity: 60 tonnes fracture explosives + 400,000 detonators simultaneously. All facilities available for client hire.

Project Portfolio

Trusted Drilling & Explosives Contractor — East Africa.

SUNSHINE MINING COMPANY LIMITED — Gold Mining Operations, Tanzania

01

LVC has provided continuous explosives supply and blasting pattern support to Sunshine Mining Company Ltd. Our scope includes product selection, delivery logistics, on-site technical supervision, and post-blast performance assessment for gold mining operations.

02 Busolwa Gold Mine

Supply of INNOPAK and VIPERDET systems. Blast design consultation for underground stoping.

03 Buhunda Gold Mine

Surface bench blasting supply. PGAN and bulk emulsion with technical field visits.

04 Nahad Crushers Company

Quarrying explosives. Bench blasting pattern design for optimal aggregate fragmentation.

Mining Operations Projects

0

1

CATA Mining

Tanzania

Explosives supply and blasting support for CATA Mining gold operations. VIPERDET electronic detonator systems supplied with technical field oversight and post-blast review.

0

2

Katavi Mining Company Ltd

Katavi Region, Tanzania

Remote site logistics and explosives delivery to the Katavi Region. Rock assessments and blasting pattern designs prepared for surface and underground operations.

0

3

XEPA Resources

Tanzania

Ongoing supply of ANFO blasting agents, initiation systems, VIPER boosters, and comprehensive post-blast technical review services.

Blasting Pattern Drilling Projects

"Precision in every drilling — Meets Your Explosive Requirements"

01 Surface Blasting Pattern Drilling

LVC conducts comprehensive site visits before every drilling assignment. Rock type, fracture patterns, hole specifications, and explosive load are determined precisely ensuring maximum fragmentation efficiency and safety.

02 Underground Face Drilling & Blasting

Underground face drilling, stope drilling, and tunneling using VIPERDET SD and LP series detonators for controlled sequential initiation in narrow reef and wide-reef environments.

03 Quarrying & Aggregate Production

Pattern design optimised for clean fragmentation, reduced oversize, and efficient crusher feed sizing supplied to Nahad Crushers Company and other quarrying clients.

Explosives Supply — Gold Mining

Sunshine Mining Company Limited, Tanzania

LVC Company Limited supplies a comprehensive range of explosive products to Sunshine Mining Company Ltd, supporting their gold mining operations. Work encompasses continuous product supply, delivery logistics, and technical supervision across multiple phases of mining operations.

0**1**

Site Assessment & Planning

Pre-blast site surveys to assess rock properties, identify optimal drill locations, and configure explosive charges for maximum fragmentation efficiency and safety compliance.

0**2**

Product Selection & Supply

Selection and supply of INNOPAK, VIPERDET LP/SD series, VIPER Boosters, and associated initiation systems tailored to each phase of the mining operation.

0**3**

Technical Field Support

On-site technical personnel deployed during blasting operations ensuring product performance, safety adherence, and post-blast rock fragmentation assessment.

0**4**

After-Sale Service

Ongoing technical consultation, product replenishment planning, and blasting pattern adjustments as the mine progresses to deeper horizons.

Additional Projects

A selection of further work completed across various mining and quarrying operations.

Tanga Cement — Tanzania

Tanga
Region

Explosives supply and blasting support for aggregate and raw material extraction. Surface bench blasting pattern design and product delivery.

Reverse Circulation Drilling Support

Tanzania

Explosives and blasting accessories supplied for RC drilling operations initiation systems compatible with reverse circulation exploration programs.

Farkwa Dam — Geotechnical Blasting

Dodoma
Region

Rock clearing and foundation blasting for civil infrastructure. Precise charge configuration for controlled blasting near sensitive civil structures.

Liganga Area — Iron Ore Sector

Njombe
Region

Supply of fracture explosives and detonator systems for iron ore extraction. Blasting pattern designed for hard rock iron ore horizons.

Gold Mine Road & Pad Preparation

Various
Regions

Drill pad and access road preparation blasting enabling exploration drill rigs to access remote mining sites safely and efficiently.

Small-Scale Miner Support Program

East Africa

Dedicated supply program user-friendly explosive packages supplied with practical on-site guidance and comprehensive after-sale technical support.

Our Clients

LVC serves a growing portfolio of mining and quarrying operations across Tanzania.

Sunshine Mining Company Ltd

Gold Mining, Tanzania

CATA Mining

Mining Operations, Tanzania

Busolwa Gold Mine

Gold Mining, Tanzania

Buhunda Gold Mine

Gold Mining, Tanzania

Nahad Crushers Company

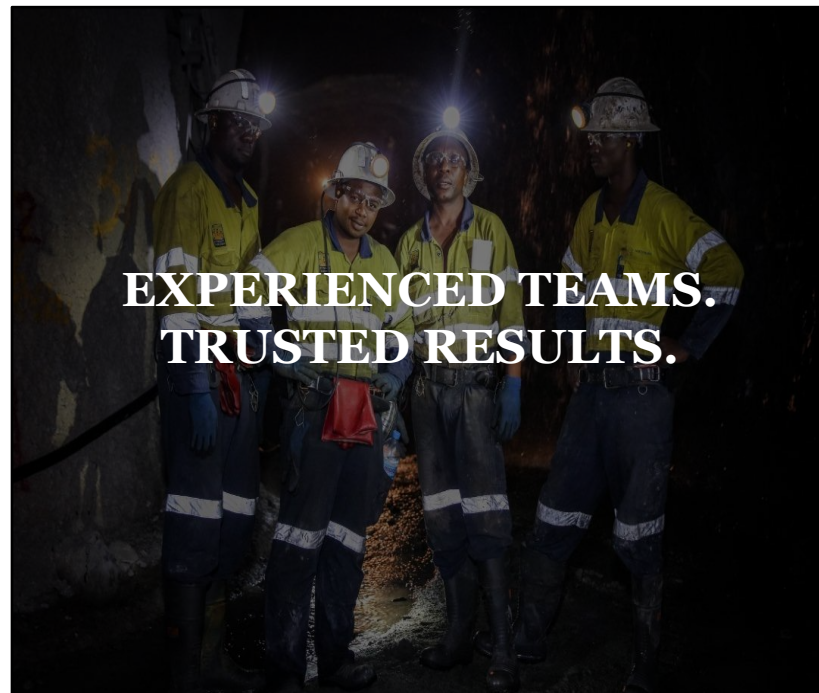

Quarrying & Aggregates

Katavi Mining Company Ltd

Mining, Katavi Region

XEPA Resources

Resources & Mining, Tanzania

LVC serves clients across gold mining, aggregate quarrying, and general mining making world-class blasting technology accessible at every scale of operation.

Regulatory Compliance & Licensing

Full regulatory authorisation; the most comprehensive compliance portfolio for an explosives dealer in Tanzania.

Permit to Sell Explosives

Ministry of Minerals

Ref. EA 147/249/01H/62

Granted under Section 26(1b), Explosives Act 1963. Sales to licensed users only.

Why Choose LVC Company Limited?

The only fully licensed, Tanzanian-owned explosives company with dedicated magazine storage and international-grade product supply.

Full Regulatory Compliance

6 government licences Ministry Permit, 4 Magazine Licences, Business Licence, TIN, VAT, Tax Clearance. No other provider matches this package.

World-Class Products

Authorised importer for BME (Omnia Group) and Tan Nobel the same brands used by major global mining operations on four continents.

Technical Expertise On-Site

We design blasting patterns, supervise execution, and provide post-blast review delivering real, measurable value per tonne moved.

100% Tanzanian Owned

Proudly Tanzanian-owned and managed. We understand local geology, regulations, and logistics committed to building Tanzania's mining industry.

All-Scale, All-Season

From artisanal miners to large gold mines wet season or dry LVC guarantees product availability and technical support 365 days a year.

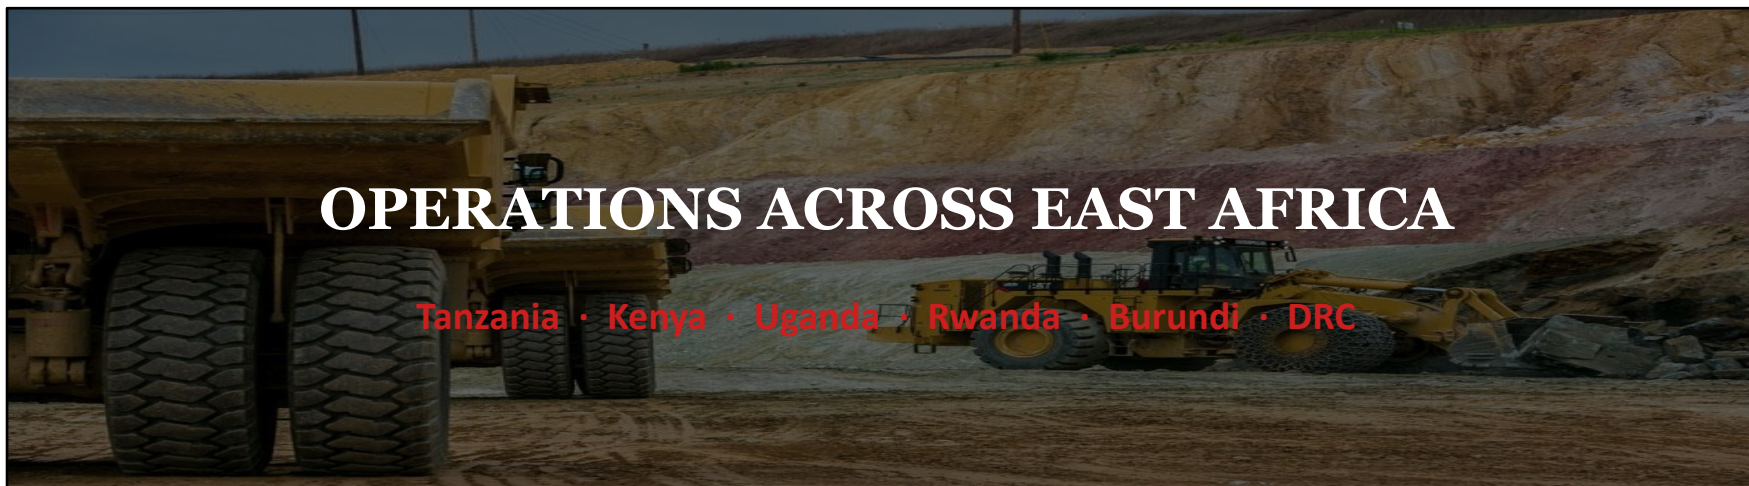

Competitive Pricing & After-Sale

World-class blasting technology at accessible prices. Our after-sale support is comprehensive and our goal is always long-term client partnership.

East African & International Reach

LVC operates across Tanzania and supplies neighbouring East African countries — with growing international supplier networks.

Supplier Network

Direct supply partnerships with BME (South Africa) and Tan Nobel plus regional logistics providers for cross-border delivery.

Regulatory Footprint

Tanzania's comprehensive regulatory compliance sets the standard for all LVC operations maintained for cross-border supply engagements.

Growth Strategy

LVC is actively building presence in neighbouring East African markets bringing competitive, world-class explosive products beyond Tanzania.
